*SOUTHERN HORIZONS
BY
WILLIAM HAYNES

Comments by Mr. Charles Smith, Accountant
Production & Marketing Administration
Atlanta, Ga.

The author of this book, William Haynes, has subtly exposed the fallacy of the publicist's time-worn phrase that "industry is moving southward!" Being a sound economist and a practical observer, Mr. Haynes definitely points out with statistics, facts and stories that the trend of the economic future of the South depends entirely upon the development of its own resources. It is obviously the author's opinion that the days of dominion status in this district can be ended, together with the evils of cheap labor, imported capital, and lack of processing facilities. His book is full of the wherewithal necessary to accomplish these objectives and stories of men already engaged in the development of the new South.

*HAYNES, WILLIAM. SOUTHERN HORIZONS. New York, Van Nostrand, 1946. 316 p.
280.002 H33.

FAIRCHILD, HENRY PRATT. DICTIONARY OF SOCIOLOGY. New York, Philosophical library. 1944. 342 p. 280 F163D.

"Every science must have its special vocabulary or terminology. Science deals with ideas, thoughts, concepts, and these must be expressed in words. Even the facts which are the groundwork of science must be set forth largely in words. No science, therefore, can have any more precision and exactitude than the words or other symbols, such as mathematical or chemical formulae, in which it is embodied. Quite generally, this situation calls for a special dictionary or glossary for each particular science."— Preface.

FAULKNER, EDWARD H. UNEASY MONEY. Norman, University of Oklahoma Press. 1946. 114 p. 281.12 F27.

"The author is no stranger to controversial issues. His book "Plowman's Folly" started one of the greatest farming arguments since the tractor first challenged the horse. In this book he tackles courageously and realistically the problem of prices, wages, and salaries." —Book Jacket.

FLECK, H. RONALD. PLASTICS, SCIENTIFIC AND TECHNOLOGICAL. Ed. 2. London, Temple. 1945. 361 p. 309 F62.

"The modern plastics industry is based on natural products which appear to be in inexhaustible supply. The rapidity with which the industry has expanded is shown by the astonishing number of new materials proposed and put into production in the last thirty years. This record is proof of the remarkable amount of research and development carried out all over the world, and shows the success achieved in the rearing of this lusty industrial infant."

HEDRICK, U.P. GRAPES AND WINES FROM HOME VINEYARDS. New York, Oxford University Press. 1945. 336 p. 95.2 H35.

"General and technical treatises without number discuss grapes and wines. Bulletins and magazine articles enlarge the world's literature on this favorite fruit and its product, wine. Methods of growing grapes change, and new varieties appear every year. Nearly all that has been written in this country is for professionals — for people who toil for money. The present author is writing for amateurs — those who toil for joy." —Preface.

RODALE, JEROME IRVING. PAY DIRT; FARMING AND GARDENING WITH COMPOSTS. New York, Devin-Adair 1946. 242 p. 57.4 R61.

"A revolution in farming and in gardening is in progress all over the world. The author tells us what is wrong and why, from his own experience, and that of a great many of the world's leading farm experts, horticulturists and soil biologists — and how organic farming and gardening change the picture. Compost has displaced the use of chemical fertilizer in many sections. A fertile soil is the foundation of healthy crops, healthy livestock, and last but not least healthy human beings." —Introduction.

SOUTHERN REGIONAL COUNCIL. THE SOUTH, AMERICA'S OPPORTUNITY NUMBER ONE. Atlanta, Ga. 1945. 44 p. 280.002 S63.

"A series of addresses delivered at a conference on the South's Post-War Economy held at Atlanta, Ga., April 11-12, 1945, under the sponsorship of the Southern Regional Council. The South needs industrialization. Full employment means an enormous further expansion of even our war-expanded economy."

SPRAGUE, HOWARD BENETT. BETTER LAWNS. Garden City, Doubleday 1945. 205 p. 97.6 Sp7.

"This book is intended for all those who are interested in good turf, whether it be on lawns, parks, estates, golf courses, or other recreation fields. Growing grass on such areas is no longer a matter of chance. With an understanding of the requirements for growth of desirable turf plants, it becomes relatively easy to adopt measures at hand that will make the greatest use of the soil and the climatic conditions at hand." —Preface.

VAN DERSAL, WILLIAM RICHARD. THE LAND RENEWED; the story of soil conservation, by William R. Van Dersal and Edward H. Graham. New York, Oxford University Press, 1946. 109 p. 56.7 V28.

"Both the authors of this book are connected with the Soil Conservation Service of the Department of Agriculture. They have written a clear vivid story of how our land can be saved for ourselves and for future generations. Striking photographs carry further the points made by the text." — Book Jacket

AVIATION

AIR TRANSPORT OF AGRICULTURAL PERISHABLES. U.S. Dept. of Agr. Misc. Pub. 585. Washington, 1946. 44 p. 1 Ag84M.
